

- ☑ Do not use acids, caustic solutions, solvents or emulsifying products when cleaning or maintaining the grease trap.
- ☑ Remove or open lid/s.
- ☑ Scoop the accumulated top grease layer out of the trap and deposit in a tight sealing container for proper disposal.
- ☑ Drain the grease trap in order to remove solids that may have settled on the bottom of the grease trap.
- ☑ Depending on the size of the grease trap, accredited waste disposal Companies will drain and dispose of the contents and issue a Certificate.
- ☑ Once the water has been removed, scrape down the sides, baffles, and any soiled surfaces of grease. Dispose in tight sealing containers.
- ☑ Replace/close the lids. Make sure the seal is compressed properly.
- ☑ Refill the grease trap.
- ☑ Record grease trap maintenance activities on supplied Monthly/Weekly Action Sheet.
- ☑ Request a certificate from the Waste Disposal Company and file. These records may be requested by Inspectors.
